

Allergies and blood transfusion preferences

Make important risks and preferences visible before admission.

Choosing treatment

Questions for an individual conversation with your care team.

Make important risks and preferences visible before admission. These questions can help you ask for an individual plan. Answers depend on your situation and the people responsible for your care.

Questions to take to my team

☐ How will my medicine, contrast or latex allergies be recorded and managed?

☐ Can we discuss blood transfusion needs, alternatives and my preferences before surgery?

For discussion and personal reference. Your care team's individual instructions take priority. For an emergency, contact your local emergency service; do not wait for a community reply.
